

SUNOLOY®

Non-Stick Coatings for Hot Plate Welding

Technologically Advanced • Proprietary Coating Solutions • Used Worldwide

- **Ultimate Wear**
- **Increase Productivity**
- **Excellent Non-Stick Performance**
- **Higher Heat Stability**

Sunoloy® proprietary non-stick coatings are “tough-as-nails” for exceptional protection from abrasion, uniquely-formulated to deliver release and durability unrivaled for both OEM and aftermarket hot plate welding equipment.

Rugged, impenetrable non-stick surfaces mean savings - reduced downtime and longer intervals between maintenance. Improved mechanical properties at higher temperature assure reliability.

Sunoloy’s proprietary, uniquely-formulated non-stick coatings reflect our commitment to your Ultimate Productivity and perfect hot plate welding.

Advantages of Sunoloy®

Excellent Non-Stick/Release • Low Surface Energy • Reduce Changeover • Higher Heat Stability
Exceptional Protection from Abrasion • Maximum Cycle Life • Excellent Adhesion
FDA Approved Versions Available • Increase Product Quality
